

PIPING & CONTAINMENT SYSTEMS

SPLIT TEST BOOT

HIGHLIGHTS

- The hinged design of the split test boot allows for fast and easy installation onto and removal from APT™ brand XP pipe.
- The test boot can be used as a removable testing tool, or left in place as a permanent piping system component.
- In retrofit applications, the existing rubber test boots can be cut off and discarded with no need to take the piping connections apart to install the split test boot.
- Schrader valve can either be used for pressure testing or removed, then jumpered for closed systems (with vacuum sensors), or left open into the sump for open systems (with liquid sensors).
