

POWERED

OUR MOTOR IS YOUR BUSINESS.

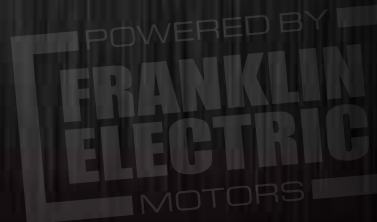

Proven track record. Benchmark performance.

PERFORMANCE | RELIABILITY | SAFETY | TRUST | EXPERTISE

Inside your submersible pump is the motor that drives your business. Day in and day out, that motor operates inside your station's fuel tank and you don't even notice. You've never needed to. It does its job without fail and it lasts, delivering fuel to your customers' vehicles every single time they pull up to the pump.

That's because it's a Franklin Electric motor, which has powered submersible pumps for every manufacturer in the industry for years. As we welcome new, healthy competition into the marketplace, it's more important than ever to know what's in your pump—and to insist on the best. Only a Franklin Electric motor has a proven track record of performance, reliability, and safety.

That's why at Franklin Fueling Systems, you'll never get anything else.

OUR MOTOR IS YOUR BUSINESS. TELL US ABOUT IT.

Franklin Powers My Business Contest

Franklin Electric motors have powered the benchmark performance delivered by FE Petro brand pumps since they were first introduced to the market. Tell us why you choose our FE Petro brand to power your business and you could win one of 10 iPads®. Grand prize includes this STP cutaway, plus get free gear just for entering.

Share your story to win: franklinfueling.com/motor.
