Bulletin No.: B1007-01

To: Global Distribution

From: Jay Walsh - Vice President, Marketing

Subject: Healy Facility Relocation

We would like to take this opportunity to inform our business partners that we will be relocating our Healy Systems operations from Hudson, New Hampshire USA to our recently expanded Fueling Systems headquarters' facility in Madison, Wisconsin USA.

With the sharp rise in sales of Healy vapor recovery equipment and the expected continued growth from several legislated initiatives around the world, we determined that the current Healy facility was inadequate for our needs and that our customers would be best served by consolidating the Healy Systems production into our recently enlarged, state-of-the-art ISO-9000:2000 certified facility in Madison.

Since September 4, 2007, we have been delivering all Healy products from the Madison facility. This step creates the opportunity for one shipment on one invoice for Healy, FE Petro, APT, EBW, and Phil-Tite branded products. Further, Healy can now be included in the minimum net invoice values to qualify for free freight within the USA.

During this transition we expect no issues with the availability of Healy products, and after we have completed the move later this year, Healy products will carry a shipment lead time of one week or less.

Please contact our Customer Service group with any questions.

Sincerely,

Jay Walsh
Vice President, Marketing
