

Franklin Fueling Systems

Fueling Innovative Solutions

Date: October 29, 2007

Bulletin No.: B1007-05

To: Pipe & Containment Distribution

From: Gary Saltz, Product Manager - Pipe & Containment

Subject: **Sump Lid Puller (SLP-1000) No Longer Shipped with Sumps**

Due to the success of our sump lid redesign for the TS-4542 and TS-4736, Franklin Fueling Systems will no longer be shipping the Sump Lid Puller (SLP-1000) with every polyethylene turbine sump that is purchased.

The new design of the sump lid features a large grip handle for easy removal of the snap-on lid and gasket that securely seals the lid to the turbine sump. The SLP-1000 is still available to be purchased separately.

New Sump Grip Handle

SLP-1000

Please contact our Customer Service group with any questions.

Sincerely,

Gary Saltz
