

Advantages

- Multi-industry proven power line communications technology
- Save weeks of installation time
- Save thousands of dollars in costly conduit installation and avoid damaged and blocked conduit
- No disruption of forecourt by having to break concrete
- No need to pull wires
- Will not interfere with dispenser operation
- UL approved for installation in most common dispenser models
- Works even if some dispensers are on different phases
- Console DTU can be installed next to the TS-550/5000/EMS of breaker panel

TS-DTU Data Transfer Unit

Patent Pending

Avoid the mess, go Wireless! The Wireless option for Vapor Recovery Monitoring consists of the TS-DTU Data Transfer Unit which uses power line communications technology to transmit data from the Vapor Flow Meters and Vapor Pressure Sensor back to the INCON console across the dispenser power wires. Available for use with most common dispenser models, the TS-DTU can save you thousands of dollars in conduit installation costs when upgrading your site with Vapor Recovery Monitoring (ISD). Available for use with TS-550, TS-5000 and TS-EMS consoles, one Data Transfer Unit is interfaced with the console and connected to up to three phases of site power. Other Data Transfer Units are installed in the dispensers using the TS-DRK (Dispenser Retrofit Kit) and connect the Vapor Flow Meter and Vapor Pressure Sensor to the dispenser power.

Model	Description
TS-DTU/P	Data Transfer Unit, one per dispenser plus one for the console
TS-DRK	Dispenser retrofit kit, one per dispenser

Note: CARB approved under Executive Order VR-202-H.

Time is running out, California

The April 2009 Stage II EVR upgrade deadline is looming. If you still need to obtain permits, purchase your equipment and arrange for installation by a certified contractor, don't panic. The TS-DTU eliminates the need to run additional communication wires for your ISD upgrade, cutting installation time and cost significantly. In addition, your station will remain free from the delays and shutdowns caused by having to break concrete for installation.

Save money

For a limited time, Franklin Fueling Systems is offering a discount on an entire Stage II EVR package, including the TS-DTU. When you purchase Healy and INCON products together as an EVR upgrade solution in the State of California, you can save 10% on the entire system. Contact your local distributor for details on this special extended offer.
